***THE NEXT FRONTIER* DOCUMENTARY HONORED WITH TWO EMMYS FOR OUTSTANDING ACHIEVEMENT**

SACRAMENTO, Calif. – The Professional Engineers in California Government (PECG) is proud to announce that *The Next Frontier: Engineering the Golden Age of Green* has been honored with two Emmys for Outstanding Achievement by the San Francisco Chapter of the National Academy of Television Arts & Sciences.

The Next Frontier was awarded Emmys for Outstanding Achievement: Documentary and Outstanding Achievement: Graphics & Animation.

“Our entire organization is honored to be recognized with two Emmy Awards for *The Next Frontier*,” said PECG President Matt Hanson. “It’s our hope that these awards encourage more people to check out our film and learn about the important issues of climate change and renewable energy technology that can dramatically improve the future.”

The Next Frontier has been shown on network and public television stations in 90% of the country and is being used in the classroom by teachers from California to Florida.

This is the third Emmy Award-winning documentary sponsored by PECG. The Academy previously honored *The Bridge So Far – A Suspense Story* and *A Span in Time*.

PECG represents 13,000 state-employed engineers and related professionals responsible for designing and inspecting California’s infrastructure, improving air and water quality, and developing clean energy and green technology.

About The Next Frontier

The film is produced by Filmsight Productions and sponsored by the Professional Engineers in California Government (PECG). PECG has sponsored several documentaries including The Bridge So Far – A Suspense Story, Amazing: The Rebuilding of the MacArthur Maze and A Span in Time.
